POWERED LABEL DISPENSER

New! The LD-100 and LD-200 now dispense Transparent Labels as well as normal labels!

Meet LABELMATE's new line of Powered Label Dispensers. These versatile products bring the industry new convenience and reliability in Label Dispensers.

You can choose the **LD-100** or **LD-200** that automatically advance your next label and present it for instant picking, or the LD-100S that continually advances labels at the rate you choose. The **LD-100S** also includes an ON-OFF Foot Switch for production applications. It is ideal for very small or transparent labels, too!

Using the latest technology, these useful Label Dispensers work with nearly any kind of label. The **LD-100** and **LD-200** have an adjustable infra-red-Optical Switch that senses the beginning of the next label and stops the label advance. This feature allows you to set up the Dispenser for various length labels and to compensate for labels that may have a tendency to curl up.

The LABELMATE Label Dispensers are easy to set up, too. You just slide your roll of labels onto the built-in Core Holder. Then thread the label web through to the take-up spindle and your Label Dispenser is ready for use! Rugged, heavy-gauge steel construction and precision parts yield products of the highest quality. Designed for all-day, every-day use, these Dispensers are backed by LABELMATE's famous **3-Year Parts and Labor Limited Warranty**, assuring you trouble-free performance.

LD-100	Meet the new standard in powered Label Dispensers! The LD-100 automatically advances the next label ready to pick. Fast label loading. Quick and convenient operation! Now dispenses transparent labels too! See the LD-100S for very small labels.	115	220	110mm minimum	€565
LD-200	Same features as LD-100.	165	220	110mm minimum	€620
LD-100S	Label Dispenser with variable speed control and foot switch. Ideal for very small or transparent labels.	115	220	110mm minimum	€640
C-1	Counter option for Label Dispenser LD-100 & LD-200 (factory installed).	-	-	-	€125
LD-FLANGES	Inner and outer Flange option for Label Dispenser (per pair). Fits all models.	-	220	-	€48

*Suggestion: For larger label rolls up to 13" in diameter, use a **UCAT-S** Economy Unwinder with your Label Dispenser. Shown with the **LD-100** Label Dispenser. The UCAT-S Outer Flange is optional.*

Full Size "CAT-2" Heavy-Duty Label Rewinders

LABELMATE's **Constant Adjustable Torque™** ("CAT") technology has made the silent, easy-to-use **CAT-2** the "**Industry Standard**" Label Rewinder. There are no awkward dancer arms, troublesome belts or clutches. The standard **CAT-2** handles labels up to 155 mm (6-inches) wide and will wind a roll of labels up to a 330 mm (13") diameter. Torque and Direction are fully controllable from the Control Panel. Dual torque ranges provide plenty of power for use with a LABELMATE Slitter, too.

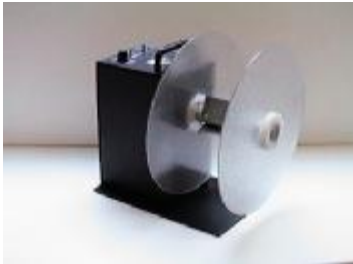

LABELMATE Heavy-Duty "CAT" Rewinders are designed for continuous duty operation in rugged environments. With the option **R16** (available on all CAT-2 except ACH), you can rewind label rolls up to 400 mm (16-inches) in diameter.

Model **CAT-2-ACH** includes an Adjustable Core Holder that accepts any core size from 25 mm to 100 mm (1-inch to 4-inches) in diameter and up to 155 mm (6-inches) in width.

The optional Adjustable Paper Guide **APG-CAT** with movable arm can be installed in minutes on the base of the **CAT-2-ACH** or **CHUCK**. This inexpensive accessory guides the outer edge of the label roll as it's being rewound to ensure even roll alignment.

The newest **CAT-2** is the **CAT-2-CHUCK** that includes LABELMATE's durable "**Quick-Chuck™**" quick-locking Core Chuck, permitting the fastest loading and unloading of cores and label rolls. The **CAT-2-CHUCK** is ideal for label slitting applications, high-volume production environments, or anywhere the ultimate convenience in Rewinders is desired. The **CAT-2-CHUCK** is available for 38-,40-,44-,70, 76- and 100 mm cores.

Rugged, heavy-gauge steel construction allows your **CAT-2** Rewinder to be simply set in place. Special anti-slip feet keep the unit from moving. The **CAT-2** handles any rewind job and with its "HIGH" torque range can also power the LABELMATE **S-100** or **S-200** Label Slitters. Reliable, high quality and maintenance-free, the Heavy-Duty **CAT-2** Label Rewinders feature a **3-Year Parts and Labor Limited Warranty**, the longest in the industry. Put LABELMATE **CAT-2** Label Rewinders to work for you today and enjoy a new dimension in label rewinding convenience and reliability. Custom colors, badging, and special core holders are available for private label applications.

New TWIN-CAT-2 Dual Spindle Rewinder

Low-Cost “Mini-CAT” Label Rewinders

The popular MINI-CAT Label Rewinders are the world's lowest-price Label Rewinders. They are capable of rewinding label rolls up to 125mm (5 ") wide (115 mm or 4½ -inches for MC-11), up to 220 mm (8.6") in diameter at speeds up to 25 cm/sec (10-ips).

The MINI-CATs can also be used as Label Unwinders.

The MINI-CAT-10 (**MC-10**) has a 76 mm (3") diameter core holder. You can also use the included “coreless rewind” feature to rewind directly on-shaft.

The MINI-CAT-11 (**MC-11**) includes a precision-crafted Adjustable Core Holder that adjusts in seconds to accept any core diameter from 25- to 102-mm (1" to 4"). The **MC-11** will also do coreless rewinding.

Both MINI-CATs use LABELMATE's proprietary Constant Adjustable Torque™ (“CAT”) technology to achieve impressive, reliable performance at an unprecedented low price. A special motor, designed specifically for the MINI-CATs, offers bi-directional operation and trouble-free performance. A switch conveniently controls the amount of rewind force. No awkward tensioning arms, troublesome belts, or clutches are used and no speed adjustments are required. Your MINI-CAT automatically adjusts to any printer speed up to 25cm/sec (10-ips) and even allows label back-feeding automatically if your printer requires it.

The MINI-CATs have an inner label flange to keep the edge of the label web aligned as the labels are being rewound. Also available is an optional Adjustable Paper Guide (**APG-MC**) that mounts directly to the **MC-10** or **MC-11** base plate and guides the outer edge of the labels. For the **MC-10**, an optional plastic Outer Flange (**MC-10 2nd Flange**) is also available. See photos below right.

MC-10

MC-11

Size: H-W-D 229 x 152 x 279-mm (9 x 6 x 11").

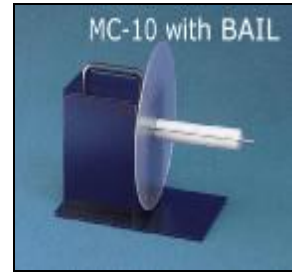

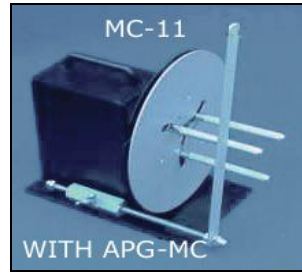

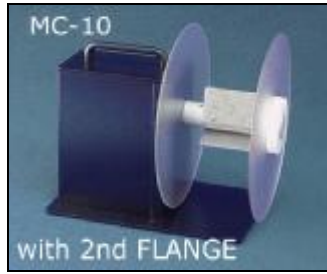

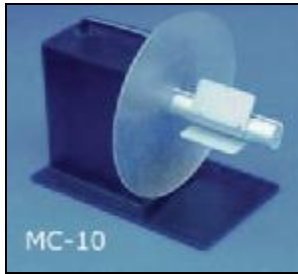

Weight: 5.9 kg (13-lbs.).

Power Requirements: 220-240 vac 50Hz. UL / CSA Listed Power Supply. 120vac 60Hz. 20 va. units are available at the same price.

“UCAT” Heavy-Duty Label Unwinders

A label unwinder is what you need to manage your label supply rolls. From very inexpensive to very sophisticated, LABELMATE’s family of Heavy-Duty “UCAT” Label Unwinders will keep your label production running smoothly. All LABELMATE Unwinders are bi-directional.

UCAT-S: This is the world’s least expensive professional Unwinder. It is unpowered and has a trouble-free fixed brake. The UCAT-S accepts up to 330 mm (13”) diameter rolls and up to 155 mm (6”) width, 76mm (3”) cores.

UCAT-1: This is the classic LABELMATE Unwinder with Adjustable Speed-Proportional Braking. Up to 330 mm (13”) diameter rolls and 155 mm (6”) width, 76mm (3”) cores. Optional 255 mm (10”) width, 400 mm (16”) roll diameter and a 25 mm to 100 mm (1” to 4”) Adjustable Core Holder are available. Please see the table of available models next page.

UCAT-2: This powered Unwinder automatically tracks label usage and provides powered label feed at speeds up to 76cm /sec (30-ips). The **UCAT-2** accepts standard 76mm (3”) cores and rolls up to 330 mm (13”) in diameter. 255 mm (10”) width is available. It can also be used as a full-featured Label Rewinder without any special setup. LABELMATE’s renowned Constant Adjustable Torque™ control system allows precise adjustment of feed speeds and rewind torque. External STOP / RUN Input included.

UCAT-40: A powered Unwinder like the UCAT-2, but with an impressive 40 cm (16”) roll diameter capacity. Supplied with LABELMATE’s 76 mm (3” dia. X 6.6” width) “Quick-Chuck”™, the UCAT-40 gives you the ultimate label Unwinder for volume production.

With the option **R16** (available on all UCAT except ACH), you can unwind label rolls up to 400 mm (16-inches) in diameter.

An optional outer Flange is available to guide the outer edge of the label web to ensure an even roll edge.

NOTE: UCAT-S & UCAT-1 are unpowered and do not rewind, they only unwind. The UCAT-2 & UCAT-40 are powered and can also rewind.

“S-100 & S-200” Heavy-Duty Label Slitters

These inexpensive LABELMATE Label Slitters allow you to print small labels several across (“up”) and then slit them to the desired width. This multiplies your print efficiency by a factor equal to the number of labels across, and dramatically increases your print head life and efficiency of ribbon usage.

The rugged LABELMATE **S-100** and **S-200** are High-Speed, Heavy-Duty Label Slitters identical in construction except for size. They are used with a LABELMATE CAT-2 Label Rewinder, and optionally with a UCAT Label Unwinder. The CAT-2 Rewinder pulls the label web through the cutting blades and rewinds the slit labels. The Slitters can be used either “in-line” or “off-line”. In “in-line” use, the Slitter is placed between the printer output and the Label Rewinder. The slitting speed is determined by the printer output speed. In “off-line” use, the Slitter is placed between a UCAT Unwinder and a CAT-2 Rewinder. Off-line slitting is recommended for production work or for use with three or more blades. With slitting speeds up to 76cm/sec (30-ips) in “off-line” mode, you’ll make fast work of your slitting jobs.

An optional six- (6) digit PC-1 Pre-set Counter allows you to pre-set the number of labels to be slit. When the counter reaches the preset number, it sends a “HALT” signal to the CAT-2 Rewinder. Power to the CAT-2 rewind motor is then shut off and braking is applied. You’ll have no annoying label spills to contend with.

The easily replaced slitting blades are click-adjustable, maximizing their useful life. Special, very sharp, ground steel blades are supplied with the S-100 and S-200 and are recommended for replacement. No tools are required for blade adjustment or replacement. During slitting, the blades are stabilized with LABELMATE’s proprietary system, giving a clean cut at all speeds. Rugged, heavy-gauge welded steel construction and precision parts yield a product of the highest quality.

Model S-100 with 2 blades & optional PC-1 Pre-set Counter

Size: HxWxD S-100: 305x305x305mm (12x12x12-inches) S-200: 381x381x381mm (15x15x15-inches).

“S-100S & S-200S” Slitting Stations. Complete “Off-Line” Label Slitting Solutions

Here's the most convenient solution for slitting and rewinding narrow labels. LABELMATE Label Slitters allow you to print small labels several across (“up”) and then slit them to the desired width. This multiplies your print efficiency by a factor equal to the number of labels across, and dramatically increases your print head life and ribbon usage efficiency. Now LABELMATE brings together all the items you need in these new Off-Line Slitting Stations and saves you money at the same time.

First, you print your narrow labels several across and rewind them onto a single core. This allows you the maximum printing production rate. Then, you bring your labels to a LABELMATE **S-100S** or **S-200S** Slitting Station. There you slide your label roll onto the Unwinder, run the labels through the Slitter, and rewind them onto your narrow cores on the CAT-2 Rewinder. Because this operation is being done Off-Line, you can slit at speeds up to 76 cm/sec (30 ips), or even more. Your setup is easy because you don't have to deal with the printer at the same time.

An optional six- (6) digit PC-1 Pre-set Counter allows you to pre-set the number of labels to be slit. When the counter reaches the preset number, it sends a “HALT” signal to the CAT-2 Rewinder. Power to the CAT-2 rewind motor is then shut off and braking is applied. You'll have no annoying label spills to contend with.

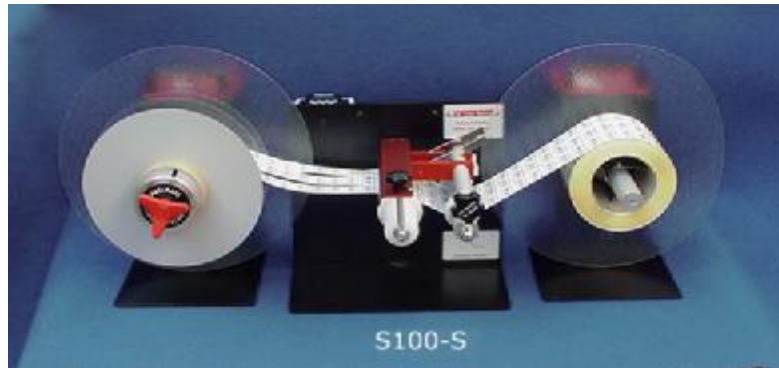

The easily replaced slitting blades are click-adjustable, maximizing their useful life. Special, very sharp, high-speed blades are included. Order extra **HSB-10** Blades supplied in convenient 10-Blade dispensers. No tools are required for blade adjustment or replacement. During slitting, the blades are stabilized with LABELMATE's proprietary system, giving a clean cut at all speeds. Rugged, heavy-gauge welded steel construction and precision parts yield a product of the highest quality.

S-100S Off-Line Slitting Station. The Model S-200S looks the same with a wider width capacity up to 255mm (10-inches). Additional blades can be easily added. Give LABELMATE a call to discuss your particular requirements.

“COUNT 100 & COUNT 200” Heavy-Duty Label Counters and Complete Counting Stations

The **PC-1 Label Counter** is a popular option on our **S-100** and **S-200 Label Slitters**. Many times, however, users don't need to slit labels, just count them. To save users money, LABELMATE has introduced two Label Counters and Counting Stations based on the **S-100** and **S-200** Slitter chassis but without the Slitter function. The **COUNT-100** and **COUNT-200** will handle label webs up to 170 mm and 255 mm (6.5- and 10-inches) wide respectively. A **CAT-2** Rewinder pulls the labels through the counter. The versatile Counters can be used at the output of a printer, or can be used with an Unwinder and a **CAT-2 Rewinder** to form a stand-alone off-line label inspection / counting station.

The **COUNT-100** and **COUNT-200** Counters can count up or count up to a preset count as you wish. If desired, when the pre-set count is reached, the **COUNT-100** and **COUNT-200** can send a “HALT” signal to the **CAT-2 Rewinder**, causing it to stop.

The Count Stations have lots of versatility. For example, if you want to count labels that are 3-up on your label web, you can set the Counter scaling factor to three and it will read out the actual number of labels that have passed the sensor. The sensor itself is a state-of-the-art infra-red transmissive device that shines through the label web and detects the gap between successive labels. There is a sensitivity control to adjust for different kinds of label webs.

The **COUNT-100** and **COUNT-200** Counters are reasonably priced saving hundreds compared to purchasing a complete Slitting Station with Counter. Quality and reliability are cornerstones of the LABELMATE Product Line. Rugged, heavy-gauge welded steel construction and precision parts yield a product of the highest quality. LABELMATE Products are trouble-free and covered by our famous **3-Year Parts and Labor Limited Warranty**, by far the longest in the industry.

Save even more on a complete Off-Line **COUNT-100** or **COUNT-200 Package** that includes the Counter plus a Rewinder and an Unwinder.

Model COUNT-100 Label Counter for webs up to 170 mm (6.5”). COUNT-200 has similar appearance, and handles label webs up to 255mm (10”) wide.

The COUNT-100 Counting Station Package includes a CAT-2 Rewinder and an Unwinder.

Size: HxWxD Count-100: 305x305x305 mm (12x12x12-inches). Count-200: 381x381x381mm (15x15x15-inches).

MODEL	DESCRIPTION	WEB WIDTH (mm)	PRICE EURO	NOTE
COUNT-100	PC-1 Preset Counter mounted on chassis with guides to position label web through sensor gap. Adjustable counter sensitivity. Counts single / multi-across labels or preset batch size. Can stop rewriter (CAT-2) automatically when job is finished.	170	€659	Requires a CAT-2 Rewinder to pull your labels through the Counter. Can also be used with a Label Unwinder to form a complete off-line label counting and manual inspection station. No slitting function is included.
COUNT-200	Same as COUNT-100 with wider width capacity.	255	€805	

"QUICK-CHUCKS"[™] Quick-Loading Core Chucks for Volume Label Production

Here is the best answer for quick loading and unloading of label rolls. LABELMATE's precision, maintenance-free "**Quick-Chuck**"[™] Core Chucks permit you to mount or remove a roll of labels on your rewinder or unwinder in seconds. They are ideal for heavy rolls, production operations, or for holding multiple cores for slitting. Quality European design and construction insure smooth and trouble-free operation.

To use a **Quick-Chuck**, just slide your label roll over the Chuck and turn the convenient lock knob. Instantly your roll is locked in place. To remove the roll, just give the lock knob a quick turn to the left and pull the roll off your machine!

LABELMATE's **Quick-Chucks** are now available in six different diameters to accept popular core sizes. An optional Outer Flange (**FLANGE-QC**) is available for the 76 mm (3-inch) "**Quick-Chuck**" Models. An Adjustable Paper Guide (**APG-CAT**) can also be used to guide the outer edge of the label web.

The **UCAT-1-CHUCK**, **UCAT-2-CHUCK & UCAT-40** Unwinders and the **CAT-2-CHUCK**, **Twin CAT-2 & CAT-40** Rewinders come equipped with a **Quick-Chuck** as standard. Or, you can buy **Quick-Chucks** individually for your in-house or OEM Applications.
